

Realizing that individuals live in a complex society, the board is hopeful that each student, in addition to the more academic preparations provided by the public schools, will have the opportunity for basic training in desirable moral and ethical values in preparation for assuming a useful role in society.

It is understood that all students will not learn all things equally well, but all should have an equal opportunity in the pursuit of an acquisition of knowledge. The board will attempt to balance its program to provide for the varied needs and interest of the student in its schools. The board accepts the premise that the student is the center of the school curriculum and that the instruction program should be tailored to fit a child-centered program of education.

The board views that educational process as a comprehensive program which must be undertaken in cooperation with other institutions of our society and will seek to establish and maintain strong ties with parents and community programs.

Goals and Objectives

In prescribing courses of study for students during each year of the district's educational program, the board subscribes to the following goals and objectives.

Academic Development

The academic program will assist students (depending upon their individual needs, interests and abilities) to grow intellectually and to think rationally.

Development of Desirable Qualities of Citizenship

Each student will be assisted to use knowledge and skills for perpetuating and improving a democratic society and for developing a respect for the rights, opinions and values of others so that the student may live as a responsible, mature, functional member of the community.

Improved Physical Fitness

The twofold purpose of physical fitness is to assist the development of healthy minds and bodies and to provide experience in activities which will provide beneficial leisure time activities as adults.

Development of Employment Skills

Because many students will seek employment upon completion of their secondary schooling, all students will be given the opportunity to engage in career-oriented preparation courses.

Development of Moral and Cultural Values

The instructional program will attempt to assist students in understanding the various traditions and morals of other cultures.

Academic Freedom

Academic freedom shall be guaranteed to students, and no arbitrary limitations shall be placed by teachers upon study, investigation, presentation and interpretation of facts and ideas concerning man, human society, the physical and biological world and other branches of learning when pursued in accordance with board policy, rules and regulations or in the absence thereof, administrative approval.
